As an over-the-road truck driver, the XM traffic and weather function has been a life saver for me. It has kept me out of serious trouble that I could never been aware of from listening to the local radio stations. Often when coming into the service areas of standard radio, one never knows where to tune in to listen to local reports. Satellite radio is a great service. Please allow free commerce to remain free. If the broadcasters cannot compete in the marketplace, maybe they need to improve their service. They should not be allowed to restrict the markets.
